Sentinel® Performance LS, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically to enable equine athletes to meet their genetic potential and excel in the many aspects of performance. Exclusively formulated with high fat, high fiber and low starch/sugar ingredients, it is an ideal choice for equine athletes involved in a variety of competitive disciplines as well as horses with elevated caloric requirements such as hard keepers and rescue horses. This unique formulation of Sentinel® Performance LS is also recommended for certain horses with challenged digestive and/or metabolic systems. A pressure-cooked feed offers a safe and natural way to provide essential nutrition and extra calories to performance horses and is easily digested for optimal nutrient utilization.

GUARANTEED ANALYSIS

Crude Protein, Min.	12 %
Lysine, Min.	0.60 %
Methionine, Min.	0.30 %
Threonine, Min.	0.45 %
Crude Fat, Min.	12 %
Crude Fiber, Max.	20 %
Calcium, Min.	0.65 %
Calcium, Max.	1.15 %
Phosphorus, Min.	0.60 %
Copper, Min.	50 ppm
Manganese, Min.	130 ppm
Selenium, Min.	0.55 ppm
Zinc, Min.	160 ppm
Vitamin A, Min.	5,000 IU/lb
Vitamin E, Min.	160 IU/lb
Biotin, Min.	0.45 mg/lb
Total Omega-3 Fatty Acids, Min.	4.7 g/lb
Total Omega-6 Fatty Acids, Min.	24.5 g/lb
Total Bacillus Species, Min.	454 million cfu/lb
(Bacillus Licheniformis, Bacillus Subtilis)	

1 qt = 0.85 lbs

Immune System Support – Antioxidant nutrients support tissue integrity and strength, helping to maintain normal muscle activity and helping to minimize oxidative induced damage in body tissues. A healthy immune system aids in disease resistance, maintaining overall health.

Muscle Performance – Amino acids such as Lysine, Methionine and Threonine are the building blocks of quality protein necessary for the continuous rebuilding and repair of muscle tissue in performance horses.

Body Structure and Function – Biologically available minerals and vitamins help build and maintain all body tissues including bone and muscle, help regulate metabolic activities and help support the immune system to sustain overall health.

Sequential Release of 'Cool' Energy – A specific balance of fat and fermentable fiber released at different rates in the body to meet the complex demands of the equine athlete.

Low Starch and Sugar Ingredients – A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying up, DOD, EPSM, colic and laminitis.

Healthy Rate of Intake – The light and airy nature of pressure cooked feeds may facilitate the breakdown of feed for horses while encouraging slower consumption and more thorough chewing. A slower rate of intake with more complete chewing may help minimize the risk of digestive upsets, such as colic and choke.

High Nutrient Density – Provides more actual nutrition by weight; you may feed less while delivering more of what your horse needs for optimum health and ideal body condition.

Stable Digestive Environment – Direct-fed microorganisms and fermentation products aid in maintaining healthy digestion and active microbial fermentation for sustained nutrient digestibility, absorption and assimilation. These additives may support the presence of beneficial bacteria in the gut, resulting in sustained horse health and a more stable digestive tract environment.

Built-In Fiber – Highly fermentable fiber sources such as soybean hulls, beet pulp, alfalfa meal and rice bran support healthy digestive activity while providing extra calories in a safe and natural form.

Healthy Skin and Hair Coat – Highly digestible fat from Soybean Oil and Flaxseed (sources of Omega-3 and Omega-6 fatty acids) helps provide extra calories for maintaining ideal body condition and helps promote a healthy skin and hair coat.

Brain and Visual Support – Docosahexaenoic Acid (DHA), an Omega-3 fatty acid, is a structural component of nerve cells in the brain and eyes and a key component of heart tissue. Studies have shown that DHA is important for mental and visual development and plays a key role in the anti-inflammatory process.

Fixed Formula – A consistent formula, bag after bag, featuring only the highest quality ingredients, to prevent sudden changes in the diet to improve digestive health and function.
