

LT LIFE TIME FORMULA

Sentinel® LifeTime, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically for active junior, adult and senior horses specifically where joint health is a potential concern. A high fat, high fiber complete feed fortified with essential nutrients plus **Glucosamine HCl** and **Chondroitin Sulfate** provides superior nutrition to meet the physiological and metabolic needs of active horses for a lifetime of health and performance. This unique formulation of Sentinel® LifeTime is also recommended for certain horses with challenged digestive and/or metabolic systems. A pressure-cooked feed offers a safe and natural way to provide essential nutrition and calories to *active* junior, adult and senior horses and is easily digested for optimal nutrient utilization.

GUARANTEED ANALYSIS

Crude Protein, Min.	13.5 %
Lysine, Min.	0.60 %
Methionine, Min.	0.25 %
Threonine, Min.	0.50 %
Crude Fat, Min.	10 %
Crude Fiber, Max.	20 %
Calcium, Min.	0.65 %
Calcium, Max.	1.15 %
Phosphorus, Min.	0.60 %
Copper, Min.	50 ppm
Manganese, Min.	125 ppm
Selenium, Min.	0.50 ppm
Zinc, Min.	155 ppm
Vitamin A, Min.	4,500 IU/lb
Vitamin E, Min.	150 IU/lb
Biotin, Min.	0.45 mg/lb
Glucosamine Hydrochloride, Min.	650 mg/lb
Chondroitin Sulfate, Min.	220 mg/lb
Total Omega-3 Fatty Acids, Min.	4.2 g/lb
Total Omega-6 Fatty Acids, Min.	23.0 g/lb
Total Bacillus Species, Min.	454 million cfu/lb
(Bacillus Licheniformis, Bacillus Subtilis)	

1 qt = 0.85 lbs

Immune System Support – Antioxidant nutrients aid in maintaining the integrity and strength of cells and tissues in active horses, helping to sustain a lifetime of health and wellness.

Strong and Healthy Tissues and Joints – Amino acids such as Lysine, Methionine and Threonine are the building blocks of quality protein necessary for growth and maintenance of all tissues including bone, muscle, hoof and hair. **Glucosamine HCl** and **marine-source Chondroitin Sulfate** are ingredients to help support joint and connective tissue health.

Body Structure and Function – Biologically available minerals and vitamins help build and maintain body tissues, help regulate metabolic activities and help support the immune system to sustain overall health.

Sequential Release of 'Cool' Energy – A specific balance of fat and fermentable fiber provides safe calories released at different rates in the body to meet the complex demands for active horses.

Low Starch and Sugar Ingredients – A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying up, DOD, EPSM, colic and laminitis.

Healthy Rate of Intake – The light and airy nature of pressure cooked feeds may facilitate the breakdown of feed for horses while encouraging slower consumption and more thorough chewing. A slower rate of intake with more complete chewing may help minimize the risk of digestive upsets, such as colic and choke.

High Nutrient Density – Provides more actual nutrition by weight; you may feed less while delivering more of what your horse needs for optimum health and ideal body condition.

Stable Digestive Environment – Direct-fed microorganisms and fermentation products aid in maintaining healthy digestion and active microbial fermentation for sustained nutrient digestibility, absorption and assimilation. These additives may support the presence of beneficial bacteria in the gut, resulting in sustained horse health and a more stable digestive tract environment.

Built-In Fiber – Highly fermentable fiber sources such as soybean hulls, alfalfa meal, beet pulp and rice bran support healthy digestive activity while providing extra calories in a safe and natural form.

Healthy Skin and Hair Coat – Highly digestible fat from Soybean Oil and Flaxseed (sources of Omega-3 and Omega-6 fatty acids) helps provide extra calories for maintaining ideal body condition and helps promote a healthy skin and hair coat.

Brain and Visual Support – Docosahexaenoic Acid (DHA), an Omega-3 fatty acid, is a structural component of nerve cells in the brain and eyes and a key component of heart tissue. Studies have shown that DHA is important for mental and visual development and plays a key role in the anti-inflammatory process.

Fixed Formula – A consistent formula, bag after bag, featuring only the highest quality ingredients, to prevent sudden changes in the diet to improve digestive health and function.
